

# Newsletter Sept. and Oct. 2021

## Conserving Energy

You can conserve energy at work, school, or at home. It's a good idea to have electronics you aren't using off. For example, when you aren't watching TV you should keep the TV off. Here are some other ideas to conserve energy. 1: Never keep a light on when you aren't in the room. 2: Never leave a game running when you aren't playing. 3: Never use air conditioning when you aren't in the building. 4: Insulate the building. Those are some ideas that you could do in any building. Now you might be wondering why I included "insulate the building". That is because then you don't have to keep your a/c or heater on all the time. If you have any more ideas, just let me and the newspaper crew know.

- David Shellum

## OCTOBER

- 1 No School, Compensatory Day
- 11 Picture DAY
- 11 PTA Board Meeting 9:30 a.m.
- TBD Reflection Awards Assembly
- 20 Early Dismissal
- 21-22 Fall Recess

“The student first and always”

# ASKING FOR HELP

1. Find someone who can help you.
2. Look at the person.
3. Ask the person if he or she has time to help you.
4. Clearly explaining the kind of help you need.
5. Thank the person for helping.
6. If the person is not able to help you, then look for another person who may be able to help you better.

## Joke of The Month!

**Che A. Jane N.**

Q: Why do we tell actors to break a leg?

A: Because every play has a cast!

# Recycling and Air pollution

## Air pollution

Like a lot of parents, you probably worry about your kid or kids walking home in a bunch of smoke. We have ways we can prevent this from happening. During the winter your car is freezing so you turn on the air conditioning. Do you go into school and leave your car running? Well, that's a big part of it, turn off your car!

## Recycling

As a school, we have a lot of paper. We soon recycle all of that paper, but you kid or kids bring home a lot of paper that goes into the garbage. Well, try your best to recycle because we could reuse it! We only get to recycle paper but u can recycle way more stuff than that! It would be like Earth day every day!

-Nora Rosander

## Interviews:

### Mrs. Woolsey/Mrs. Yeamans

These past 2 months we have been working on interviewing Mrs. Woolsey, but she got married last year and is now Mrs. Yeamans. Mrs. Yeamans said that her favorite subject to teach is math and this is what she said. "Math because it makes sense and there are many ways to teach it." Mrs. Yeamans said she likes the school colors but she thinks they should add green because it is her favorite color. And she said she rates the school 8.5 because she doesn't like to give tests. And last but not least, Mrs. Yeamans said her favorite kind of bear is a teddy bear.

# ‘Cuteness Club’ Takes Shape

---

Once there was a kid with big dreams, a kid who saw something missing in the world. That “kid” implemented them into society by utilizing his own unique personality, and in doing so impressed every older person who doubted him. He’s determined to prove age isn’t everything by showing his maturity and stature using everything he can give.

This website creator is just an 11-year-old 5<sup>th</sup> grader who, with the help of his sister, created a platform to sell his own merchandise. “Believing your ears and not what your eyes tell you is a part of life.” Quotes this creator. Cuteness Club is the online animal shop you’ve only been able to imagine in your dreams. Future has a definition that can’t be told, and this kid is the definition of the new world you didn’t see coming. Society has created this world, but its natural possibilities will remain endless. They tried to control the past, but nothing will stop the future. Reality is nuclear energy and the outer coldness of space fused together in time.
