 - a. Community Members/Community Council Members/Mr. Carbaugh/District Representative

5. Meeting adjourned

71% free & reduced lunch
315 +
25% come in morning
100

Breakfast in the Classroom

Granite School District has produced a video which can be viewed on graniteschools.org or on You Tube—Granite School District, Breakfast in the Classroom. It contains information from principals, teachers, and students. The video was produced in March 2015. Out of 62 Elementary Schools we currently have 26 schools participating in Breakfast in the Classroom and 3 more scheduled to begin in the next month.

Some of the highlights from the video are:

Ernie Broderick, Stansbury, principal---

1. Attendance has improved dramatically---the school went from # 6 in the district to # 1 in the district in just a few months.
2. Before the program started only about 50% of students were coming to school without having eaten breakfast. Now, 90% of students eat breakfast in the Classroom.
3. This is a voluntary program, students may choose to participate, or not participate.

Allesen Peck, David Gourley, Principal---

1. This was taken to the school Leadership team—they were asked to look at the pros and cons. Their reply was--- “We have hungry students” what are the cons?
2. Breakfast in the classroom has reduced morning discipline
3. Late busses are no longer an issue, the students have breakfast waiting for them in their classroom room

Jadee Talbot, Wilson, principal---

1. Decrease in tardies
2. Students are more calm and focused
3. Before 36-42-% of the students ate breakfast at school, now 92% eat daily

Teachers---

1. Not so noisy at the beginning of the day
2. Students are on time
3. Ready to learn
4. More content

Students---

1. Do better in school
2. Smarter brain
3. Can eat and get right to work
4. No longer have to throw away food when the bell rings to go to class
