

Introductions – N/A

Agenda item 1 – Needs Assessment: reviewed assessment data given to us by the consultants. Briefly reviewed the 4 needs that we will be focusing on in the coming meeting.

3 instructional areas – students should monitor and understand what we expect them to learn. Instructional staff uses evidence-based strategies. School provides rigorous course work, challenging but not too hard.

3 cultura areas – staff should have high expectations for themselves and students. Teaching the teachers on how to get he parents more involved in. The school needs to provide the ability to collaborate with parents.

Consultants feedback: Students do not monitor or track their own progress. Instructional staff does not use evidence-based strategies. Principals and teachers do not have sufficient and consistent high expectations for themselves and students. School does not adequately promote implementation of adequate strategies to engage with parents.

Agenda item 2 – Safe Walking Routes: Reviewed the routes in place. A few adjustments need to be made to the route specifically in the areas that seems to loop. Adding one crosswalk near the school.

Agenda item 3 - Reviewed update of SCC member contact information on the school website. Phone number and email of members were removed due to large amount of spam.

Notes - Remind Brett: Can you please send an update for make-up Spring Picture Day?

Next agenda items: Next school year plan (4 needs from consultants).
