School Goals 2024-2025:

Mr. Dan discussed the school goals for the upcoming school year relative to academics, talent development, and social skills and dispositions. The council looked at the student Panorama survey results as it relates to attendance, "a Sense of Belonging", etc. It was noted that some subgroups struggled with a sense of belonging. It was determined that the female students would benefit from a concentrated effort from the staff moving forward. The council also suggested different competitions, incentives, and strategies which could be used to promote improved attendance.
