

7th Grade Immunization Clinic

The following vaccines are required for students entering 7th grade in the state of Utah:

2 MMR, 2 Hep A, 3 Hep B, 4 Polio, 5 DTaP, 2 Varicella (chickenpox), 1 T-dap, and 1 Meningococcal.

Additionally, it is recommended that children 11-12 begin the Human Papillomavirus (HPV) series to protect against certain types of cancers.

Community Nursing Services will be offering these vaccinations at your school.

Clinic Location: _____ Date: _____ Time: _____

Required

Tetanus, Diphtheria, Pertussis

- Tetanus can be found in soil and enters the body through a cut or wound.
- Whooping cough (Pertussis) causes coughing or choking, making it hard to eat or breathe.
- One dose of Tdap is required for entrance into the 7th grade in the State of Utah.

Required

Meningococcal (Meningitis)

- Affects the brain and spinal cord.
- Spread through sneezing, coughing, kissing, and sharing food or drinks with infected persons.
- One dose of Meningitis is required for entrance into the 7th grade in the State of Utah.
- CDC Recommendation: second dose should be given at 16 years.

Required

Varicella (Chickenpox)

- Causes an itchy rash all over the body.
- Can lead to severe skin infections, scars, and pneumonia.
- All school age children who have not had the disease must have two Varicella doses for entrance into the 7th grade in the State of Utah.

Recommended

Human Papillomavirus (HPV)

- Check with a healthcare professional.
- CDC Recommendation: two doses are needed for girls and boys at 11-12 years of age.

Recommended

Influenza (Flu)

- Spreads easily in school settings.
- Even healthy people can get the flu and it can be serious.
- CDC Recommendation: everyone 6 months and older needs a flu shot every year.
