School Goal:

Our goal is to reach and support 100% of our families. We aim to be committed to supporting our students and families with the necessary resources needed in and out of school. In addition to providing additional resources, we will be able to assist teachers and families with any technology issues that they may encounter.

Strategy #1 to accomplish this goal:

By providing additional funds from TSSA, we will be able to have the extra support teachers need during this pandemic. Having our Social worker full time will help us support families who are in need of support as they deal with trauma and basic needs. Having an STS will give us the full-time support needed to assist teachers and families with technology and distance learning.

Action Steps to implement this strategy:
