

Week 6 Study Guide

| | |
|---------------------------|---|
| Collaborate/Collaboration | You work together as a team to achieve a goal.! You work with other people or ants on a project. |
| Graphic Organizer | You notice the authors have included a visual representation of information - a drawing or web or graph or story board or diagram. These help you to be organized, to remember and understand stuff. |
| Measurement | We agree on a unit so we can find the (extent, dimensions, quantity...) of length, area, volume, duration, etc., and compare them. |
| Quarter | You divide something into four equal parts. |
| Sight Site Cite | This what we are seeing, a vision A specific place, location This is reference that gives credit to the original creator (citation) |
| Summarize | You give a short review. You tell the main points but leave out the small details. You don't plagiarize and you get it right. |
| Unit | There are these minimum divisions of quantities (a quantum finite value). They are standardized (always the same) and agreed upon. They measure different *things such as pressure, time, brightness, temperature, etc. |
| Viable | It can live! It works in real life; you can do it! You can make it work. You solve the problem in a way that you can use |
