

Week 13 Study Guide

Cleanliness	We are free from _____, _____, or impurities. We are in the state of being _____.
Criteria	There is a list of _____, _____, and standards (probably in a nice rubric format) that people can use to _____ your work or your knowledge
Equivalent/Equivalence	In _____, you have two amounts which may have the same _____ but they don't seem the same! The two sides are equal. Sometimes this equality is _____ (because it is a _____ we are testing)
Horizon/Horizontal	You think you see the line that forms the apparent _____ between earth and sky. Something is in a flat, level position which is parallel to the *_____. This can also mean 'at _____ to the vertical', too.
Inequality	This means not _____... In Math, we are comparing two values and we discover they are different. One value could be larger... The notation $a < b$ means that a is less than (smaller than) b The notation $a > b$ means that a is greater than (bigger than) b \leq is less than or equal to \geq is more than or equal to... In Economics, we can see that social inequality is the existence of unequal _____ and _____ for different social positions or statuses within a group or society
Order	You arrange *things according to a _____. You line up your numbers in a _____, according to their _____. * Dogs, numbers, values, ideas, food...
Perpendicular	In Math, you draw your lines so they _____ at _____ degrees. You notice the slopes of these lines are negative reciprocals yay! (Like 2 and $-\frac{1}{2}$ are negative reciprocals). We can also say something is sticking straight up; it is meeting at _____; it has an intersection of 90 degrees.
Waste Waist	<ul style="list-style-type: none"> - These are _____, worthless, or _____, thrown out after the first use - The part of the abdomen between the _____ and hips
