

# BENEFITS OF PROFICIENCY-BASED GRADING:

Focus is on learning and growth instead of accumulating points.

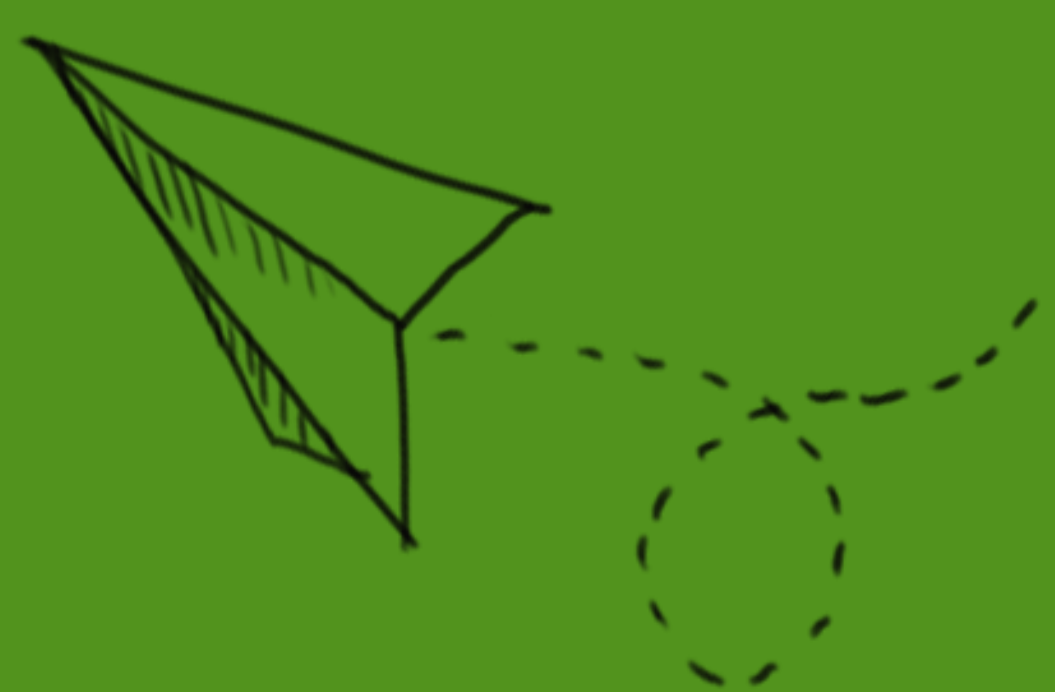

Focus on mastering skills, concepts, and standards in each course.

Multiple and frequent opportunities to demonstrate proficiency.

At any moment, parents (& students) can see their student's progress toward proficiency/mastery; learning & growth is more visible.

Behavior, participation, work timeliness, and punctuality are not part of the grade. Academic grade is a representation of proficiency in core standards only.

All work, practice & assessments, are directly connected to core standards.

All scores are based on proficiency scales to ensure grading objectivity & fairness.
