   - Goals from 2010-2011 were reviewed in light of changes at the school and additional funding.
   - Writing will be added as a focus area.
   - The specific changes to the planned steps part of the school plan are as follows: change the wording in the first two bullet points to read correctly; remove the word "two" from the reading aides in case we need to hire more; and check copyright laws on the *6 Minute Solutions* to determine if we need to order more.
   - Other changes to the plan are under expenditures which include: eliminating the need to purchase computer tables; and not purchased the Imagine Learning software program for Kindergarteners as it is $150 per student per year – we will get the program for our ELL students and determine for next year if it is valuable enough to warrant spending the funds. We will also look into eSuite next year as it is $5000 per year for the school.
4. What to do with additional funding??
   - This is the allocation of funds at this time: $1000 to Substitute Teachers for Professional Leave; $4200 to Textbooks to purchase Leveled Readers for Imagine It grades 1 to 3; $5000 to Equipment to purchase maps and encourage writing school wide; $1000 to Supplies for needed bulbs in technology; and the balance in Hourly Aides for Reading and Math help.
