

School Community Council

Rosecrest Elementary

2/12/18

- Safe UT – An electronic system to help students in crisis situations (suicide, bullying, abuse, etc.). There is an app that students can download or they can use any computer. There is a section to chat with a crisis person at the University and another section to submit a tip to school officials. We will roll this out to 5th and 6th grade students at the end of February.
- Trust Lands - Discussion on how the money is being spent this year. There is some data evidence to support our allocation of money to math aides. All SCC members agree that we should have similar goals and spending plans next year. The one potential change would be if we were able to find another great person to be a math aide we would pull money from the technology section to hire them. There is some time (about a month) before anything needs to be finalized. So if any SCC members have different thoughts on how to spend the money they can contact the principal within the next few weeks.
- Reconfiguration – There was an informal discussion again about the possibility of reconfiguring grade levels and schools in the Olympus network. Talk included the capacity of the high school building and the idea of a boundary change in order to make room for grades 9-12.
