A digital citizen is someone who is able to understand and fully participate in the digital world. They have the technical and social skills that enable a person to be successful and safe.
Developing Digital Citizens at Home

The Internet is a wonderful place for learning and entertainment. However, like the world around us, it can pose dangers to your child, your computer and your personal data.

REMAIN POSITIVELY ENGAGED
Know the online environments your children use. Sit and discuss their online life on a regular basis. Show interest in their online communities and friends. React constructively when inappropriate material is encountered. Expand your children’s online experience and their autonomy when developmentally appropriate. Help them develop safe and secure online behavior and good decision making. Be a good role model.

KEEP A CLEAN MACHINE
Safety and security start with protecting your computer with security software (anti-virus and anti-spyware) that is set to update automatically. Keep your web browser and software up to date, and back up important files on a regular basis. Keep your computer in an open area.

REVIEW PRIVACY SETTINGS
Check the privacy settings available on the social networking sites and devices your children use. Decide together which settings to use in order to provide the proper amount of protection for your child.

TEACH CRITICAL THINKING
Help your children identify safe, credible web sites and digital content. Teach them to be cautious before clicking on, downloading, posting, and uploading content.

EXPLAIN THE IMPLICATIONS
Help your children understand the public nature of the internet. Explain the risk and benefits. Emphasize any digital info they share, such as emails, photos, or videos, can easily be copied and pasted elsewhere, and is almost impossible to recover. Digital info has the possibility of damaging your reputation, friendships and future prospects.

HELP YOUR CHILDREN BE GOOD DIGITAL CITIZENS
Remind your children to be good digital friends, by respecting personal information of friends and family, and not sharing anything about others that is potentially embarrassing or hurtful.

EMPOWER & ENCOURAGE YOUR CHILDREN
Work with your children to develop strategies such as bullying, unwanted digital contact, or hurtful comments. When problems arise, develop strategies of talking to a trusted adult, non-retaliation, calmly resolving with the person, blocking the person, or filing a complaint. Encourage children to help other friends if they are making poor choices or being harmed. If your child’s behavior changes, be alert for reasons why.
