## **Skyline Places 15th in National Math Contest**

Seattle, WA – March 8, 2016 – Salt Lake City’s Skyline has some of the best high-school mathematicians in the country, as demonstrated by their 15th-place finish in the 2016 Four-by-Four Competition, a national mathematics contest administered by National Assessment & Testing (<http://www.natassessment.com>). Coach Jason Meakin prepared students for this contest, which featured ten three-minute rounds in which teams of four students attempted to quickly answer batches of four questions. This format challenges teams to decide whether to (and who will) work each problem or if their time would be better spent checking their work on easier and more familiar problems.

After results from schools across the country were double-checked, the team of Everest Fang, Yeonchul Choi, Dylan Webb, and Yuhui Yao had the highest score at Skyline, leading their school to place among the top schools in the country. Skyline participated in all four of National Assessment & Testing’s contests this year.

National Assessment & Testing administers high-quality mathematics competitions that schools can participate in via email. Their contests span a variety of formats, including individual and team tests, with each contest featuring problems ranging from easy to difficult, providing both confidence and challenges to students of all abilities.
